ABSTRACT

Prosperous nation, Happy nation, developed nation should be the slogan of all the democratic nations. Prosperity is the flourishing, thriving, good fortune and successful status. Prosperity leads to happiness and true prosperity lies in being able to supply your mental, spiritual, basic as well as physical need. True prosperity means to have at your command the things that are necessary for your existence. Prosperity should be everyone's goal. Each and every citizen of the country has a right to lead a prosperous life.

Indians are the nationals and citizens of India the second most populous nation in the world, containing 17.50% of the world's population. After Independence India, our forefathers/governments were firmly committed to nurturing, empower each and every individual through Education. They also ensure the compliance of the these human values and codes of ethics and professional morality in practice, with highest level of sincerity in all walks of life through strong emphasizes on self-discipline and good governance that ensure value based trade and business, social and religious order tuned to purity of thoughts and righteousness of action for the larger good of the humanity. It prompted our country men to nurture human excellence created a responsible global citizenship deeply devoted to peace all around.

Education is especially uniform education policy without discrimination is to be the fountain head of a developed, prosperous and enlightened human society that is required to contribute to peace, prosperity, harmony and happiness all around. Prosperity of a nation is dependent on the level of livelihood and education of its masses. It is the moral responsibility of the govt. to provide basic facilities and quality of life to each and every individual of the country.

Issue and challenges

World is moving fast. India is still developing not developed one. According to

Wikipedia a developing country is the one that has low standard of living, not so developed industrial base, agriculture, innovative techniques as compared to other developed countries.

In this globalisation India must work hard to tackle the wide spread problems of social evils, issues of corruption, education to all, women issues, issues of justice to common man which are pulling India backward. True prosperity lies in being able to supply your mental and spiritual needs as well as physical. Knowledge of how to become prosperous is very important to all.

Prosperity would be everyone's goal. Being prosperous means you have a life worth living. Prosperity brings happiness, happiness comes with the beautiful surroundings in which individual have good clothes to wear, nutritious food to eat, hygienic environment and money for education and all these basic requirements fulfilled by money. Now it the moral responsibility of the govt. and society to provide platform to earn not only to the family but each and every individual of the society to make this nation prosperous. Even after ,more than 70 years of the independence, poverty remains one of the persistent issue. It is obvious that no nation can move forward when million in its population are deprived of basic needs, have poor nutrients, education and face discrimination. Poverty usually meaning a state or conditions in which a person or community lacks the financial resources and essentials for certain standard of livings. It means lacks of basic capacity to participate effectively in society and not having enough to feed or clothe a family, not having a school or clinic to go to, not having the land on which to grow one's food or job to earn once living not having access to credit it includes no income and inability to acquire the basic goods and services necessary for survival with dignity. This usually refers to a condition characterised by several deprivation of basic human needs, including food, safe drinking water, sanitation facilities, health, shelter, education and

information. The vicious cycle of poverty means that life-long barrier and troubles are passed from one generation to another and this family circumstances throw them for exploitation in the hands of rich/resourceful persons. They enrolled these children/people in child labour, prostitution, joint terrorist organisation which is a great threat to the nation and a big barrier in making nation prosperous. "Need of the hour is to cut this vicious cycle of poverty at any cost".

Vibrant India : Prosperous India : A movement for prosperous India under the leadership of Prime Minister Sh. Narendra Modi.

In the last eight years the nation has not just change under the leadership of PM Narendra Modi but a new chapter of remarkable growth, and fast paced development is also being written. The last eight years have been a trend setter for India. The nation has moved from the politics of casteism, dynasty, corruption and appeasement to the politics of development, growth, unity and nationalism. This remarkable journey has strengthen democracy in its real sense. by empowering the marginalised sections of society – from poor and backward classes, Dalits and minorities, tribals and oppressed classes to women and youth. It has also been a journey of changing the Indian psyche – from "Nothing is possible in this country" to "everything is possible if the govt. and the people have the will and commitment".

The nation has not just changed but a new chapter of remarkable growth and fast paced development is also being written. There are several path breaking schemes Jan Dhan Yojna, Ujjwala Yojana, Kissan Samman Nidhi, Ayushman Bharat Yojana, Awas Yojana, Jal Jiwan Mission, Digital India, Gram Vikas Yojana, Goods & Service Tax – which not only empowered citizens but also strengthen our economy and made India prosperous and self-reliant.

In previous regimes, the will-power to deal with perennial problems was lacking and everything left to faith. Prime Minister Modi's innovative and decisive approach in dealing with all the problems made all the difference. No previous govt. had thought of this. Under Prime Minister Modi the govt. is committed to transform India, make India a country where All are one, All are happy and prosperous. **That is why I have written in the facebook on 23rd March 2019 "Modi Ji – Messenger from God to protect, safe and encourage every Indian to go ahead with confidence"**. It is time again to take a pledge to

work hard and commit ourselves to make India happy and prosperous nation.

To summarize, poverty anywhere is a threat to prosperity everywhere. The pathway to prosperity lies in India's capacity to reach higher economic progress, sustain it, and ensure higher standards of living of its citizens, wherein the driving force maybe education, innovation and technology. So the need of the hour is to focus on the innovation-economy which drives the economy and reaches the citizen of the country to lead a prosperous life.
